## OVERVIEW

ZKTeco is a multinational enterprise, that specializes in the manufacture and development of time and attendance and access control technology. With over 25 years presence in the global market, it benefits from a highly qualified team of over 1500 employees worldwide with its own manufacturing plants that, together with its R&D and engineering departments, ensures complete inhouse production of all aspects of its hardware, firmware and software.

One of the pioneers in multibiometric and RFID technology, ZKTeco's products are present in over 200 countries, with over 180 million users worldwide, and we continue to grow...

At the start of the 2010, ZKTeco Europe, the European Headquarters of ZKTeco was opened in Madrid and totally renewed in 2018, in order to provide European partners and dealers with the best possible services and solutions close at hand. ZKTeco Ireland Ltd and ZKTeco Deutschland GMBH were officially established in 2016 and 2018.

With its own, R&D, technical, financial, sales and warehousing facilities, ZKTeco Europe offers its clients complete support throughout the continent, to broaden horizons, open new markets, and manifest ZKTeco as a leading brand of T&A and Access Control technology in Europe.

## TIME MANAGEMENT

ZKTeco time management series includes cutting-edge hybrid biometric verification technology products and solutions. It provides a full range of solutions including various fingerprints, RFID, face identification and palm verifications, time clocks, portable time clocks, time and attendance management software, etc. It meets the demand of almost all the companies in any size.

## RFID Time Attendance Terminals

SC705 is a 13.56 MHz proximity attendance management terminal incorporated with 3" color touch screen which offers a user-friendly and easy menu management. It includes the option of displaying informative messages managed directly from software.

**RFID technology:** EM/MF/Desfire Proximity

**Communication:** Ethernet, Wi-Fi

**Features:** Real-Time Data Transmission, Online/Offline operating mode, Available Special Version for University

## ∨ iClock Series

iClock Series are a 3.5-inch TFT screen Time Attendance Terminals. Adopting an user-friendly firmware and the latest core-board, it improves performance, accelerates identification speed and possesses higher extendibility for various customization requirement. What's more, the user-friendly interface gives you a new experience.

Most of them are equipped with standard functions like TCP/IP, USB-host, camera, T9 input, and backup battery. They also have access control interfaces for Wiegand In, Wiegand Out, Door lock, alarm and doorbell.

## » Data Collection Terminals

ZKTeco's multi-functional data collection terminals, with Android platform, offers fingerprint sensor and capacitive touch screen display, and added features such as Wi-Fi and internal battery. Available with a complete middleware solution, these terminals not only focus on time management, but due to its Android Operating System, they can help you develop infinite types of applications in a comfortable and intuitive way, with the possibility to develop different solutions for a wide range of sectors in the vertical market.

- Job Costing
- Conference Management
- VIP identification
- Time Management
- Fidelity Systems
- Warehouse management
- Canteen management
- Exhibitions Visitor management

## Plug & Play Time Attendance Solution

**BioTime Web is the most innovative and simple 'Plug & Play' solution for employee time management, specially designed for small and medium business.**

The solution is based on ZKTeco's **Biopad** with an incorporated T&A application for the configuration and management of employees and their working schedules.

The uniqueness of the solution is that the Biopad comes with an integrated **Webserver**, an online time management application capable of managing all terminal data in real time through a web browser, allowing you to visualize and manage your employees' schedules from anywhere without the need of any added software.

### Attendance Reports

BioTime Web includes a flexible timetable feature, the reports of which can be exported, organized by day, week or month.

# Management Software

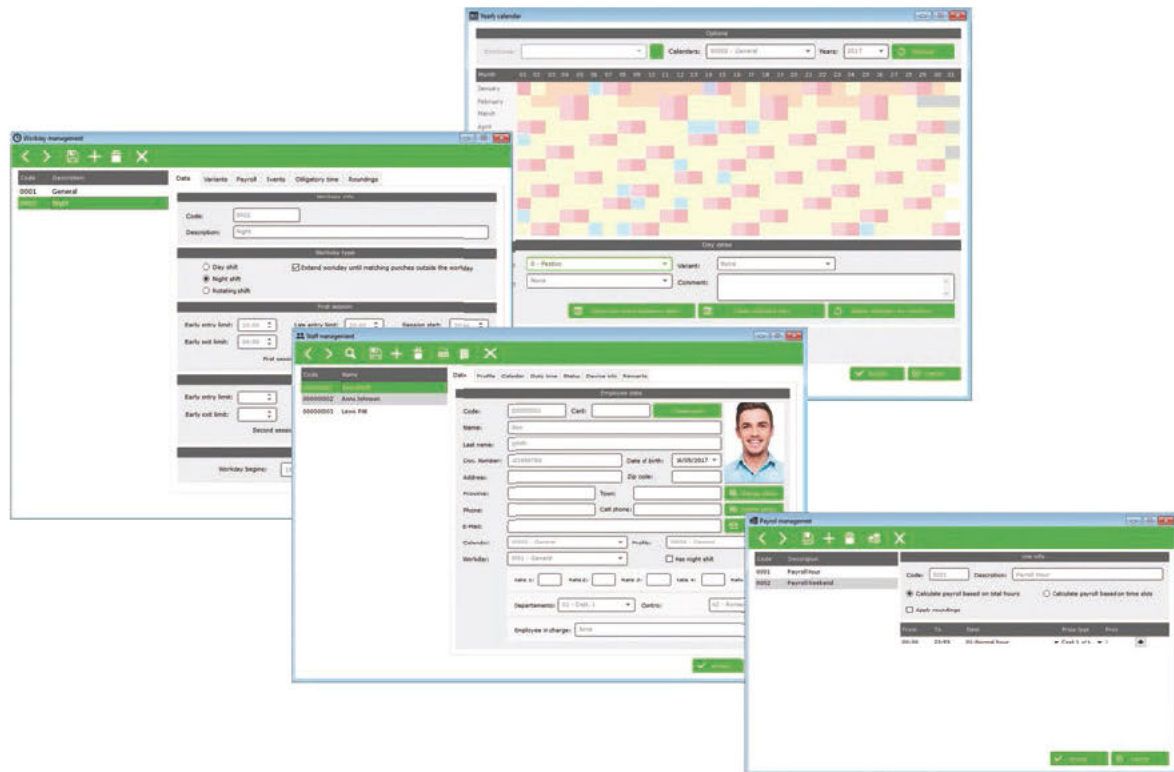

## ZKTime Enterprise Advanced Time & Attendance Software

ZKTime Enterprise is an advanced T&A application for ZKTeco terminals that allows to manage all In/Out attendance and access records, controlling all kind of accrued balance, payroll methods and attendance events (breakfast, lunch, medical, personal business, smoke etc.), .

Therefore, it includes an access control module, where you can define different access time slots and days for each employee. It can operate together with Atalaya-2, ZKTeco's web staff portal.

# ZKTime Enterprise Features

## Data and Access

Works with MySQL, MS SQL and Oracle. Allows multi-company and multi-user.

## Staff

Includes private calendar and profile (round hours, interruptions, payroll, etc..) as well as flexible work timetables. It can store fingerprints and faces of employees for recognition in biometric terminals. Imports employees from CSV.

## Work Shifts / Timetables

Supports both diurnal, nightly, rotating and flexible shifts. Allows evaluations of payroll per shift, mandatory attendance times, periods of validity of events and support for workdays over 24 hours. It is possible create estimated or fixed shift schedules.

## Calendars

Public calendars can be defined and then customized for each employee. Supports days with hourly variations or events (vacation, leave, travel, etc.).

## Payroll

Allows you to define the preferred payroll method, whether per number of hours in one day, or established time frames. Manages different payroll concepts such as regular hours, overtime, extra holidays, and so on. Payroll can compensate according to a predetermined amount of time or employee duty time.

## Accrued Balance

For each attendance event received, even work event, it allows to define multiple accrued balance types setting the different operations (add/deduct time, increase/decrease times, etc..) hereby controlling the total accrued balance, and setting the permitted value limits.

## Perfect CS Time Attendance Software for SME

### Features

- One Click Sync System
- Profound "Terminal Zone" Management System
- Auto Email Notification
- 20+ Time Attendance Report
- User Friendly UI

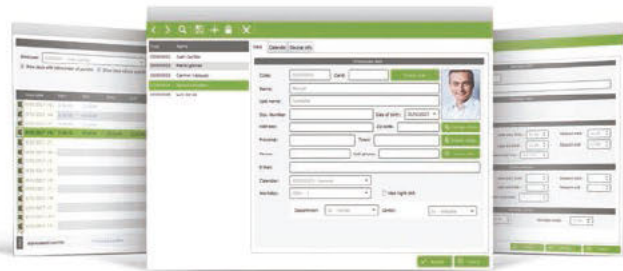

Templates	Fingerprint / RFID / Face / Palm
Devices	Time Attendance Units, Access Control Devices with ZK Standard SDK.
Networking	TCP / IP / P2P / USB
Supported OS	Windows XP/Vista/ 7/8/10 32 & 64Bit
Database	SQLite(default) / SQL Server / PostgreSQL / MySQL Etc.
Max Capacity	2000 Users, 50 Devices
Multi-Languages	English/Traditional Chinese/ Arabic / Spanish / French/ Japanese/ Russian/ Turkish/ Vietnamese

# ZKTime Small Business

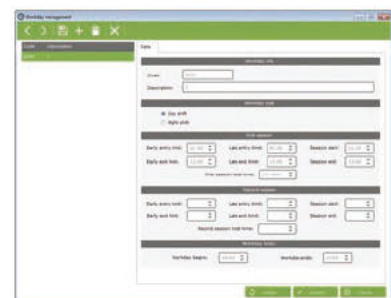

## Professional Time Attendance Software

### Features

- Avoids manual work from payroll process
- Attendance Calculation & Reports
- Supports up to 100 different events
- Multi-language
- Supports SQL Server, MySQL and Oracle databases

Supported OS	Windows XP/2000 or higher version
Hard disk Capacity	100MB free space
Monitor Resolution	1152 x 864 px
Database	MySQL, SQL Server and Oracle
Other	Pre-requisites included in the CD. Allows multi-company

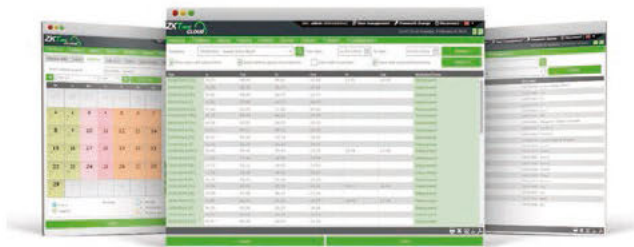

# ZKTime Cloud

## Cloud based Time Management Solution

ZKTime Cloud is a Cloud-Based software designed to manage enterprise employee time attendance. It integrates a web staff application through which employees or managers can view and print punches, credit hours, payroll, etc. Allows making petition or changes on your calendar, punches, vacation, personal data, etc. as well.

All this through the web browser, without requiring any previous software application.

# BioTime 7

## Web-Based Time Management Software

BioTime 7.0 is a powerful web-based time attendance software which offers the most innovative features a time attendance software can offer.

It provides a stable communication for devices through LAN/WAN/Wi-Fi/GPRS/3G. Users can access to the software anywhere by their web browser to remotely manage thousands of T&A terminals under complex network (WLAN).

## Access Control

ZKTeco's Access Control Product line is comprised of IP based standalone access control device, networked access control panel, readers and guard patrol and accessories with network based one-stop access control and T&A software. Thus, ZKTeco provides one-stop R&D and manufacturing services for business partners.

#### Ultrathin Fingerprint Access Control & Time Attendance terminal

- Wi-Fi Communication
- Reduced size
- BioID Sensor

**Display:** 2.8-inch TFT color Display  
**Fingerprint Capacity:** 3,000 (1:N)  
**ID Card Capacity:** 5,000 (Optional)  
**Sensor:** BioID Sensor / Silk ID Sensor  
**Communication:** RS485, TCP/IP, USB-host, Wi-Fi  
**Dimensions:** 159,8 x 80,7 x 19,4

F22 is one of the smallest Access Control terminals on the market. With 16 cm high by 8 wide, the F22 is the perfect solution for installations of maximum exigency in confined spaces.

With a minimalist design in white or black colors, the F22 incorporates the new BioID algorithm that offers superior performance in fingerprint identification. It has Wi-Fi wireless communication as well as access control interfaces for connecting external readers, offering full connectivity in any environment. F22 arrives where no one arrives.

- Standard Functions: DST, Automatic Status Switch, Anti-passback, Scheduled-Bell, External FP Reader

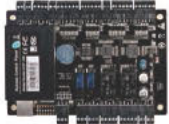

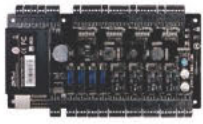

PA10 is a time attendance and access control terminal with Palm & Fingerprint Hybrid Biometrics. The Palm verification includes Palm Print & Palm Vein, so it not only is touchless, but also supports antispooof function.

The BioID sensor possesses outstandingly high identification rate towards dry, wet and rough fingers. TCP/IP, RS485, PoE (optional) and Wi-fi (optional) are also available which enable PA10 to be applied in different networks and various situations.

## Access Control Panels

Centralized administration and web-based infrastructures reduce a company's IT costs and allows an easy management of all access points from one single location. For this purpose, ZKTeco offers a whole range of access control panels, that can manage from 1 to 4 doors using either or both proximity and fingerprint identification.

# Software Management

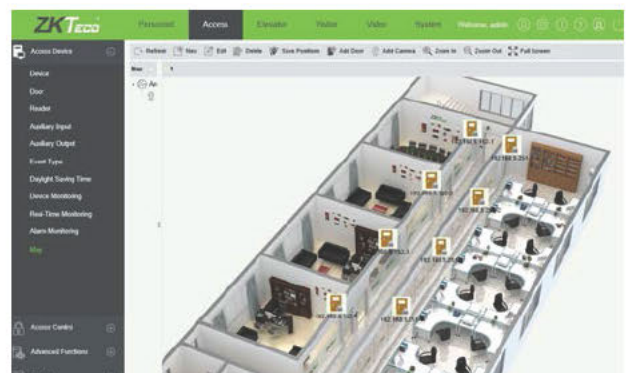

## New ZKAccess3.5 Software

Our ZKAccess 3.5 is an Access Control software application that offers complete flexibility in programming to achieve any access control performance your solution may require.

The ZKAccess system goes a step beyond conventional access control systems, by combining unique RFID and biometric identification. With its intuitive easy-to-use GUI and wizard type settings, ZKAccess provides comprehensive access control security for small-to-medium sized businesses and enterprise-level systems.

ZKAccess includes a time and attendance feature to allow administrator to define timetables, shifts, schedules, and holiday settings. It provides compact and easy-to-use report and In/Out board features.

The system controls up to 400 doors and allows integration with various database systems, event monitoring, interlock, linkage, passage mode, first-card opening, multi-card opening, visual map, T&A management and reporting features.

## Third Party software integration

ZKTeco can provide a free SDK with open libraries to be used with third party access control systems. In this way, the needs for software developers to merge different Access Control solutions in one complete and integrated solution are solved.

# Features and Applications

## Embedded Internal Biometric Identification:

The FR Series readers transmit fingerprint templates to inBIO via RS485 that matches fingerprints with templates stored in the database. Wiegand inputs are also provided for traditional RFID readers.

## Complete Access Control:

Apart from standard access control features for controlling door locks, easily programmable auxiliary relays can be used for additional control and interface to lights, alarms, intrusion detection panels, or even extra locking devices or gate controllers.

## Communication:

The access controllers can be easily integrated into your network and support both TCP/IP and RS-485 communication. The auto-discovery tool can manage the setting and modification of network parameters in a fast and efficient manner.

## Options:

Three different sizes of controllers can suit various project needs and reduce the cost of required floorspace. 1-way and 2-way models can be mixed and matched in optimized system architecture.

## Capacity:

The system supports up to 3000 fingerprint templates, 30,000 badge users and stores up to 100,000 events and transactions. Data is preserved if there is power outage. Controller can continue operating if network connection is interrupted.

## Built-in Advanced

### Access Control Functions:

Anti-passback, First-Card opening, Multi-Card opening, Duress Password Entry, and Auxiliary input/output linkages are built into controller firmware.

## Cost Efficient Management:

New controller features allows you to remotely upgrade firmware of systems out in the field, ensuring that you can manage and expand your investment value without any complex third party tools.

## For Software Developers:

Free SDK is available for integrators and OEMs (optional Push SDK for Real-Time environments) to integrate the controller with their own or existing security or personnel management applications. Upon demand, ZKTeco can customize firmware to meet any customer requirements.

## Applications

Building Entrance

Time & Attendance

Visitor Management

Sports and leisure facilities

Arena Entrance Events

Vehicle Access

# Entrance Control

Entrance control is the management of people. General management methods include access control system, parking management system and visitor management system using intelligent turnstiles. In different environments, different types of entrance control devices are required. For example, the tripod turnstiles and full height turnstiles are installed in public venues, and the flap barrier turnstiles are often installed in the private enterprises. ZKTeco commits to integrating biometrics into entrance control to provide more intelligent management solutions.

# Automatic Access Gate

## ZK110 Series

Access gate is based on the obstacle free passage system and its functions are controlled by infrared beam cells. It can be installed in any area of supervised access.

The system consists of a unit, out of the side of which extends a tu-bular barrier that closes off access and operates in the following way:

The barrier is always up, closing off access. It retracts by dropping downwards and concealing itself inside the unit on reception of an authorisation signal from a reader or push button. It allows one person to pass through, controlled by a photocell, and closes again once this has taken place. In the case that two people try to pass through at the same time, the system creates an audible alarm signal that an intrusion has been detected. As a security measure, the unit is equipped with a photocell system that stops the panel from rising up and hitting users while they are still in the passageway.

## ZK110S-D

# Motorized Access Gate

## ZKFB4 Series

This is a high transit control passage, with dimensions suitable for any surroundings or location. Its structure is built in stainless steel, offering high wear and tear resistance and its brushed satin finish makes it easy to combine with any predominant colour in the area where it is going to be installed. All this unites with excellent functionality and low maintenance, make it especially suitable for controlling enclosures where there are large numbers of people present.

### Composition and options

# Security Inspection

ZKTeco's security inspection products offer a dependable and flexible intelligence security solution. We build a comprehensive security system to protect your entrance security, including People Inspection, Freight Inspection and Vehicle Inspection.

## ↘ X-Ray

Our X-ray inspection systems increases the operator's ability to identify potential threats; the device is designed to scan briefcases, carry-on baggage, small cargo parcels.

ZKTeco X-ray Series can use reliable high quality single or double energy X-ray generator. With the superb image algorithm, X-ray system could offer clear scanning image, which allows operators to identify potential threat items visually.

With ergonomic modern design, X-ray Series could help operators to identify suspicious items fast and accurately.

# GL Series

**Green Label is a project-oriented high-end product line, loaded with stunning and innovative features.**

The Green Label concept also includes a new market strategy by strictly controlling and regulating policies such as pricing and after-sale service.

# GL Series

## What is Green Label?

Green Label is a project-oriented high-end product line, loaded with stunning and innovative features such as the revolutionary Silk ID fingerprint sensor with 3D NFPV technology, capable to provide an exceptional performance toward dry, wet and rough fingerprints and the new hardware platform: equipped with an optimized a fast 1.2GHz processor which dramatically increase the verification speed.

This advanced product line is made with a modern hardware and a fireware design and is the perfect match for ZKTeco's latest web-based software platform to provide a full featured biometric time management and security solutions.

The Green Label consists of two product lines: Time & Attendance and Access Control.

### Innovative and Modern Product Design

1. United product image, family design of molds, UI and packaging.
2. Unique PUSH HTTPS Protocol, for a fast, stable and secure communication.
3. Covers all safety standards of verifications methods.
4. Compatible with ZKTeco's latest web-based time management and security solutions, software and products.

### Customer Centric After Sale Service

1. 36-month warranty.
2. Provides full documentation including multi-language brochures, user manuals, FAQ database, solutions and case studies.
3. All Green Label faulty devices have the priority right to be repaired.

# Access Control Panels

InBio Pro is an access control panel applying Push firmware with auto-sync functionality. It supports web based software ZKBioSecurity3.0, which offers an all-in-one solution for not only access control, but also video linkage, elevator control and visitor management. Made of environmentally friendly and safe materials, InBioPro is your most reliable choice with no doubt. Only proximity version also available through C3 Pro Series.

# Elevator Panels

The EC10 controller offers the user better security, scalability and versatility in an elevator control system. The access to each floor can be controlled according to different methods of verification, by fingerprint, proximity or pin. Furthermore one can program access control time-tables, thereby creating different access levels.

All of these functionalities are particularly recommended for a company’s visitor management.

## ZKBioSecurity 3.1.0.0

### Professional Web-Based Access Control Software

ZKBioSecurity is the ultimate "All in One" web based security platform developed by ZKTeco. It contains multiple integrated modules: access control, time attendance, elevator control(online/offline), hotel module, visitor management, parking, guard patrol and video linkage. With an optimized system architecture designed for high level biometric identification and a modern-user friendly UI, ZKBioSecurity provides the most advanced solution for a whole new user experience.

## What's new in v3.1.0.0

- Newly added Time Attendance module can be used simultaneously with Access Control/Parking module.
- Newly added Parking module can effectively manage the vehicle's entry and exit using the LPR Camera or UHF or BT readers.
- Newly designed dashboard supports custom settings for different modules and also supports checking event statistics either weekly, monthly or yearly.
- Added newer advanced Access Control features such as Global Anti-Passback support setting by person, exporting report of who is inside and person availability feature and so on.
- Supports Import/Export with custom attributes and Import/Export of Personnel/Department is now more flexible.
- Module menus can also be shown in icon style. It can be customized in the setting.
- Supports automatic report functions in Time Attendance module.
- Supports OCR and ID Reader in Hotel management module.
- Updated OCR Features now supports more Countries.

## Video Surveillance

ZKTeco Surveillance Department, which is established in 2010, focuses on providing economic, competitive and well-featured security cameras in order to universally popularize security cameras. For the entry-level users, Analog HD camera and NVR are the perfect choices: up to 3 megapixel along with 4 in 1 compatible format (AHD/ CVI/ TVI/ CVBS). In 2016, ZKTeco officially launched the cutting edge long distance and wide dynamic facial recognition cameras, along with AI technology, completed with a well-developed software backend and a mobile App, which greatly enhanced the security market into another level.

## Smart Locks

Smart lock is an electromechanical lock which allows you to open and lock your doors with a virtual key of fingerprint, face, code, RFID card, putting an end to problem of lost keys and enabling an array of intelligent and useful features. In 2006, ZKTeco started to step into the smartlock Industry, with its cutting edge biometric technology to provide security and convenience for home and office.

# ZKBioBT

ZKBioBT is a creative APP for iOS platform and Android platform which allows you to unlock doors and manage users by mobile phones.

## Features

- Doors unlocking
- With ZKBioBT App, your mobile phone is your key
- Lock transaction check
- Flexible open-door duration setting
- User Management
- Delete individual user or all users
- Edit user information including name, ID and privileges

# COMPREHENSIVE SOLUTIONS

At ZKTeco we continually strive on improving technology that does just that, making you feel safer at all times, in offering global security solutions in collaboration with leading companies from different, yet related sectors.

# OPERA SERIES

## OP-200 Fingerprint Reader

Adaptable Biometric Reader for Lenel and Amag customers

### OnGuard Integration:

OP200 firmware communicates directly with OnGuard and Symmetry. Automatically synchronizes needed customer user data. Eliminates needs for middleware. Eliminates needs to manually create users in the biometric readers.

### Biometric Performance:

Advanced SilkID fingerprint recognition technology delivers optimal accuracy, matching speed and powerful fake finger detection.

### Auto Data Synchronization:

Multiple OP200s automatically synchronizes fingerprint templates. Eliminates needs for middleware. Eliminates needs to separately manage templates.

### Communication:

Wiegand-Out to Lenel access control panel Wiegand-In for connecting optional 3rd party card readers TCP/IP and RS232/485 data communication USB for offline data management

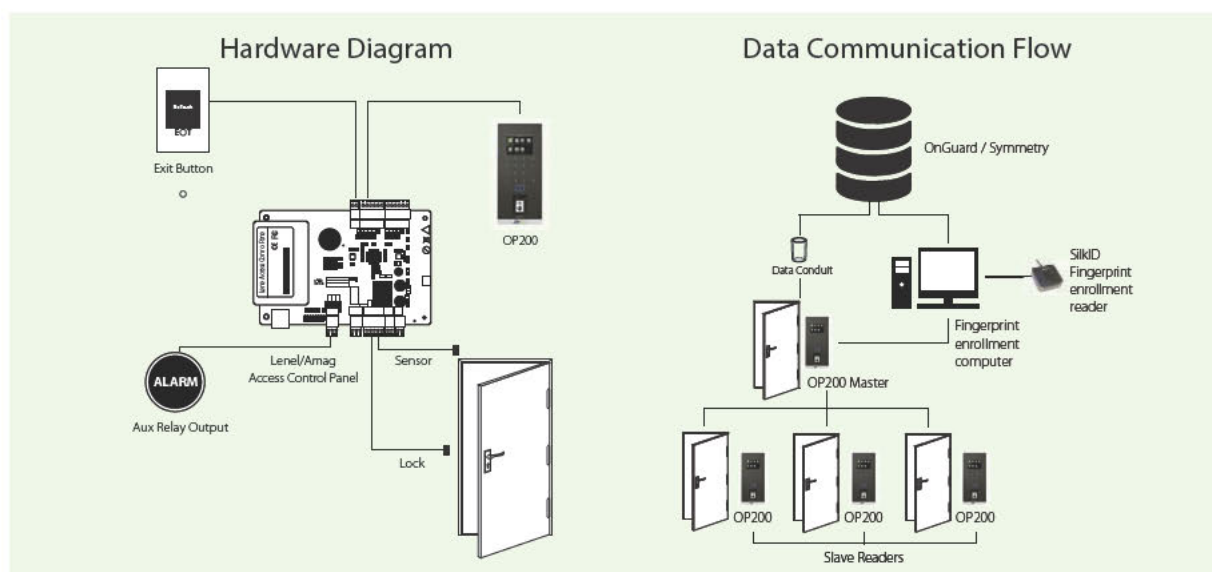

### Authentication Options: (single or multi-factor)

- ✓ Fingerprint
- ✓ RFID (HID, Mifare, Desfire)
- ✓ Password

### Capacity:

- 3,000 Fingerprint templates
- 30,000 cards
- 100,000 transactions

ZKAccess is a member of the Lenel OpenAccess Alliance Program (OAAP) since 2016. Lenel and OnGuard are registered trademarks of United Technologies Corp.

Authentication Options: (Single or Multi-factor) ✓ Fingerprint ✓ RFID (HID, Mifare, Desfire) ✓ Password ✓

## ZKProto SAP

### Human Resources Management Solution

ZKTeco presents its latest HHRR Management Solution based on ZKTeco's Data Collection System integrated with SAP.

The core of the system is ZKProto, a reliable, fast, modern, secure and flexible communication protocol based on the concepts of middleware and RPC (Remote Procedure Call).

The middleware (in case of ZKProto we use Apache Thrift) takes care of all the raw communication aspects, like sockets and everything related to TCP/IP stack.

The RPC part refers to the ability to call remote procedures/methods/functions like they were local. ZKProto is a centralized protocol as shown in the above diagram, which means the clients never actually connect between themselves but all the communication is done through the server.

The sole and unique purpose of the server is to replicate data (if needed) and resolve any data conflicts that might arise.

### Biopad Android

- Capacitive 7 inch touchscreen
- Android 4.1
- Algorithm version: ZKFinger 10.0
- Fingerprint Capacity: 6.000(1: N)
- Log Capacity: 200.000.
- Internal battery
- RFID Proximity reader.
- Communications: TCP/IP, Wi-Fi/USB Host
- Optional: Wireless LAN, GPRS, 3G,
- Built-in Battery, ID/MF, Relay, SD Card Slot

# Faciality

## High Tech Facial Access Control

Today, security is one of the most valued assets in any area of our lives. Every day we surround ourselves with people we do not know. When we find ourselves facing situations that we do not control, feeling protected against any threat is of vital importance.

Thanks to our partnership with Herta Security, ZKTeco has launched Faciality, a system combining Herta's award winning server based facial recognition with our most advanced access control systems, making it the most complete solution for the surveillance, control and protection of public spaces.

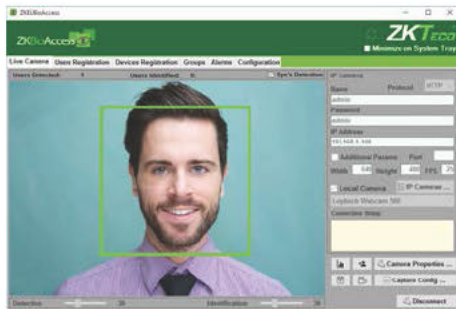

The installation and setup of all Faciality systems is very simple.

After the initial configuration on the server, the system will detect and identify individuals automatically and will apply the necessary actions previously defined in the application to each user detected.

We have four facial recognition solutions specially developed for each type of situation, from simple access control to simultaneous identification in crowded environments. All offer high detection accuracy and are compatible with our access control service.

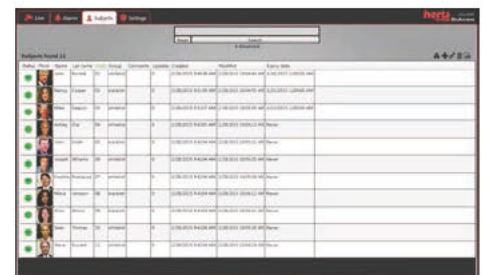

## faciality ACCESS

**Faciality Access** is the perfect solution to limit user access to physical enclosures such as buildings, offices, server rooms and overall security restricted areas.

## faciality SHIELD

**Faciality Shield** is the most advanced solution for access control. Like its most basic version but with an improved algorithm it allows users to limit access to physical premises and security restricted areas.

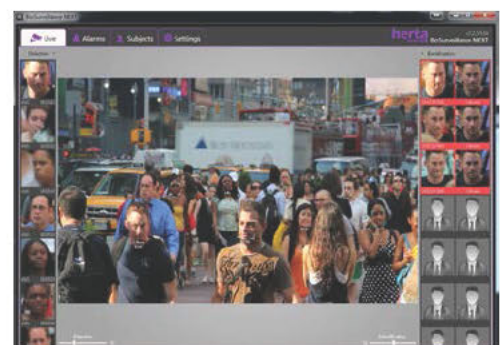

## faciality FINDER

**Faciality Finder** detects multiple faces in real time, facilitates user management at any time and even allows you to register using video capture (on-the-fly).

## faciality SCOUT

**Faciality Scout** is a video surveillance solution for high-performance facial recognition, specially designed for the simultaneous identification of subjects in multitudinous and ever changing facilities, such as airports, metro or train stations, shopping centres, sports stadiums or urban environments.

# License Plate Recognition

## Vehicle Access Management

**ZKBioAccess is a set of applications for License plate recognition with Access Control Management to use with ZKTeco Standalone terminals, Access Control Panels and barriers.** It includes a Windows Service with an application interface to use together with VPar Server by Neural Labs.

VPar provides a system for detecting and reading License Plates from Cars, Containers and Trains ID or Hazard Plates, with the maximum reading reliability, thus offering an immediate time-to-market .

- 98% or bigger reliability rating on LPR
- Recognition of 2-line vehicle plates
- Possibility of providing up to 8 vehicle plates in one image
- Integration with ZKTeco and 3rd Party IP cameras and NVR's
- Duplicated license plate filtering
- Integrates its own database
- Access Control Linkage with ZKTeco Parking barriers
- LPR from vehicles in movement (Free-Flow) or stopped (Stop & Go).
