

The property lifeguard

Alerting anyone to any floods or leaks

Water leaks in a property can be potentially devastating. They can cause a massive amount of damage to the property as well as to personal possessions and furniture, which can be particularly emotional for the property owners. Whether the leak comes from a broken pipe, washing machine or dishwasher, it can be very expensive. The WL-WE is an easy upsell that is simple to install and immediately warns of any leaks to minimise damage. It also has the capability of HomeControl+ App push notifications and more.

WL-WE WATER LEAK

Be in control with full low battery supervision

When the battery is running low the WL-WE will begin to chirp once every 32 seconds, as well as send a signal to the control panel to report the issue. If the user has a HomeControl+ App connected to the system, they can also receive a push notification to draw their attention to the problem.

Stay safe with tamper protection

If the housing of the WL-WE is not fitted properly during the initial installation, or after a battery change, the rear tamper will trigger to alert that it is not fitted correctly.

Beat the burglar with tamper protection

Any sabotage attempts from the front or back will result in an alarm activation. This ensures maximum security is maintained against accidental or malicious tampering of the system.

Partcode	WL-WE
Sensor Types	
Water leak sensor with 1m cable included	✓
Key Features	
Button sensor test	✗
LED sensor test	✗
Front and rear tamper protection	✓
3V lithium battery included	1 x CR2
1.5V alkaline battery included	✗
Signal Strength Indicators (SSI)	✓
Minimum battery life (years)	2
Warranty	2 years
Certifications	
Electrical conformity	CE
EN50131	n/a
Environmental class	II
Self-certified	n/a
Specialist certification	✗

Faster installation, less invasion, upsell opportunities & the same superior security with two-way wireless technology

• No wires, no fuss

As the system is fully wireless there is no need to run wiring by lifting floorboards or moving furniture, saving you time and money.

• One-Push-To-Learn

A feature in all Enforcer wireless devices that means learning them onto the system can be done in seconds. A simple one button learning feature for easy installation.

• Self-aware sensors

The sensor will tell the control panel when it has low battery, is in fault, or has failed supervision. The sensors provide the information the control panel needs to ensure it stays safe and secure.

• Signal Strength Indicators (SSI)

SSI in all Enforcer wireless devices allow them to be optimally positioned during installation, without the need to refer back to the panel.
